

Arabah.
March 22nd 1931.

Dear Mother.

I sent off Father's shoes this week. There was a great fuss & filling in of forms & I hope they will arrive safely.

My brushes came yesterday. They were in perfect condition. I like the smart box they were packed in. Please thank Father very much for getting them for me. They are exactly what I want. Amice thought she had got the smallest brushes made. but now she considers comparisons are odious!!!

We have got a man with a burnt leg to dress now. he put his leg in a pit of quick lime. & it is burnt up to the knee. we are using a new treatment the ship's doctor told us about. first. caron oil. To remove all dirt & foreign matter, after 12 hours the oil dressing is taken off, all loose skin is cut away & the raw surface washed ~~first~~ first with Turpentine & then with ether. to remove all trace of oil. then cotton soaked in

Tannic acid is packed on all the burnt area & kept wet for 24 hours. The acid hardens the raw skin or the flesh if the burn is deep & saves all the awful business of chipping off stuck dressings. After the acid, just ordinary vaseline dressings are used to promote healing. It seems very satisfactory so far. We removed the tannic acid dressing this morning, & the lesser burnt areas were quite dry. In two places on the calf & the heel, all the skins are burnt through & a small portion of the tendon casing exposed. These surfaces are bleeding a little but not forming matter & the vaseline rags do not stick, so it ought to heal quickly. We have a splendid way of preparing dressings we just heat vaseline in a pan over the primus & soak the lint in it.

The man is very plucky & never makes a moan when he was being skinned. We thought he looked a bit queer, so got Nannie to make him a cup of strong tea, but he refused to drink it

until we had finished, because he thought it would be disrespectful. He comes on a donkey with a friend to help him, its such a business getting him mounted as he cannot put his foot to the ground. The poor donkey nearly capsised.

The donkey I ride now is a lady & she has a baby, yesterday it came with us, & galloped & kicked up its heels all over the place. it is a darling, baby donks are so pretty & so full of fun & mischief.

This is all the news this time.

It seems strange to hear of snow in your letters when we are having it so hot here. in Cairo it was 97 in the shade, & as it is several degrees hotter here we must have been very near 100. I dont think I need a new sponge this time, the one I have is still perfect.

Lots of love to you both, also
to Pat & Mrs Childs

Your affectionate daughter
Myrtle.
