Concordance of Griffith Institute numbers and current shelfmarks and foliation or pagination

Items among Wilkinson's manuscripts which were held at the Griffith Institute Archives were given Roman (and later also Arabic) running reference numbers; within each item, pages, folios, groups of pages or folios, sometimes even individual drawings on a single sheet, were given various types of sub-number. The Roman numbers and the subnumbers are used in Porter and Moss, *Topographical Bibliography of Ancient Egyptian Hieroglyphic Texts, Reliefs and Paintings* (Oxford, 1927-51; revised and reissued, 1960-95) to identify drawings, etc. by Wilkinson relating to particular sites in Egypt.

The following concordance is designed to enable those who have a reference number from Porter and Moss (i.e., Griffith Institute Archives) to identify current Bodleian shelfmarks. It is in Griffith Institute Archives item number order (Roman numbers); current shelfmarks are given for each item. Griffith Institute subnumbers appear in the first and third columns, with the corresponding Bodleian folio or page numbers in the second and fourth columns.
