Arabah.

Dec 6<sup>th</sup> 1935.

Dear Mother.

I wonder if you have seen the notice of the death of Prof. Breasted, we saw it in the Egyptian Gazette yesterday. It must have been very sudden as he had only just reached New York. The Egyptian paper reminds its readers that he was present at the opening of Tut.ankh.amen's Tomb, & hints again of the curse being the cause of the death of all who assisted at the opening.

We are all very distressed at the news, especially as he was our guest so recently.

We had three visitors to-day, Dennis Peel was one, he is the son of the so called Cotton King. His father has the monopoly of the cotton crop in Egypt & his name here is a household word. Dennis has been at Sohag to help during Charles Oulton's absence, he is such a nice boy, about 22 or 23, a very keen air-man

a general all round sports man, he took a great interest in the temple & was thrilled with our camp out in the desert. One of the English teachers in the Sohag school came with him, & being recently married brought his wife, it is her first year in Egypt, so naturally she finds everything very exciting.

Amice goes to Cairo on Monday to have her throat done, she will be away about a week, she is not looking forward to it very much.

She has been busy with photography the last few days. She has been checking over the work of the various people who have been doing the photographs & finds there are many gaps although everything was supposed to be finished, so has had to set to ~~work~~ work to complete the series, of course all the most tiresome & difficult ones are not done. She hopes to have got through with it before she goes to Cairo & will be able to get all the plates that we are not wanting to use in the near future. all

numbered & packed ready to be shipped & stored in England. so, if trouble should arise out here there will be a complete photographic record of the temple available at the E.E.S. Everything seems to be quiet out here & everything going on just as usual.

The Humorists have arrived & we are enjoying reading them during our brief rest after lunch. All the animals are well, the guard's dog greets us every day with joyous bouncings, his master always tells him to "arise" as soon as we come in sight, but the dog does not need any reminding we have a great joke about him being a bad Mouslem because he eats his bread before the sun has set during Ramadan. we shall soon be half way through the month of fasting, there is very bright moon light to-night, so it cannot be far from full moon.

Lots of love to you & Father  
your affectionate daughter  
Myrtle,

numbered & packed ready to be shipped & stored in England. so, if trouble should arise out here there will be a complete photographic record of the temple available at the E.E.S. Everything seems to be quiet out here & everything s/<g>oing on just as usual.
