

home, unless it is bust to bits
by then. it is in excellent condition
so far. but I wish it was a little
bigger -

Later

(31)

I have just had a visit from
a most delightful doctor man.
it seems that Miss C's account
of my bitten state so alarmed
the Imp that he asked a friend
of his to call & see me.

I thought at first it was just
a social call. "friend of a friend
of mine sort of thing".
I only realized it was a
professional visit when he
suggested that perhaps he
had better see me in my
room. he said my treatment
was excellent & there was
nothing to worry about if I
continued to use reasonable

Later [Oct 13th 1929]

I have just had a visit from
a most delightful doctor man.
it seems that Miss C's account
of my bitten state so alarmed
the Imp [= Reginald Engelbach] that he asked a friend
of his to call & see me.

I thought at first it was just
a social call. "friend of a friend
of mine sort of thing". as
& I only realized it was a
professional^{sic} visit when he
suggested that perhaps he
had better see me in my
room. he said my treatment
was excellent & there was
nothing to worry about if I
continued to use reasonable

care. also I might certainly
go to Dr Junker's camp, provided
I did not walk about - or get
over heated.

We had a lovely time
out at the Pyramids. the
car took us as far as possible
then I rode a donkey the rest
of the way & the others walked;
Dr Junker had had a lovely
Tea taken out to the camp
for us. iced cakes & everything.
After Tea, I amused myself
with a pair of field glasses
while the others went round
the excavations. then the
donkey took me to the car
& the car brought me back
here.

Dr Junker is a dear. he
is lending us his cook for

care. also I might certainly
go to Dr Junker's camp, provided
I did not walk about - or get
over heated.

out at the Pyramids. the
car took us as far as possible
then I rode a donkey the rest
of the way & the others walked;
Dr. Junker had had a lovely
tea taken out to the camp
for us. iced cakes & everything.
After tea, I amused myself
with a pair of field glasses
while the others went round
the excavations. then the
donkey took me to the car -
& the car brought me back
here.

Dr Junker is a dear. he
is lending us his cook for

four months. ^(the cook -) he is well
trained in camp cooking, so
we hope for the best. 4

I think we shall have lots of
interesting visitors to our camp.

Dr Junker is coming on his way
to Nubia. also several other
nice people I have met here may
pay us a visit for a day or two.

I have met a very interesting
man I think his name is Lewis
he is a famous ~~analytical~~
analytical chemist. he was
employed in the treating &
preserving of all Tut's things,
he also works for the C.I.D.

I think he also will visit us
& will advise us as to the best
method of restoring the colours
on some of the wall decorations

^{Oct} Today an officer of the RAF
is to lunch with us. he is to

four months. he <(the cook -)> is well
trained in camp cooking, so
we hope for the best.

Oct
14/

Today an officer of the RAF
is to lunch with us he is to

give us instructions & measurements so that we can look out for a suitable landing base for one of his aeroplanes near our camp. so we may also entertain flying men. it also gives us a third line of retreat should anything happen to the railway or the Nile traffic - we are feeling important & adventurous we almost hope something will happen - it would be so thrilling to be rescued by aeroplanes. but of course nothing like that is in the least likely to happen -

Tonight we leave by the 9 o'clock train & with luck may be at Baliana by 8.30 in the morning -

Much love to you both also to Pat & Mrs Childs - Myrtle -
