To work. we left the Ford with the engine running with instructions to Sardic to stop it after a certain time. but we found this evening that the battery is still too weak to start the engine with the self starter. Elfie says there are lots of things that need adjusting that are beyond her. she thinks Amice was sold a pup. Any way it gave us some amusement to-day.

We had a visit from Monsieur Baraise who is in charge of repairs that are being done in the temple. I invited him to lunch & dinner with us. I felt quite strange playing hostess to such a large party.

Thank Pat for the Xmas letter which came yesterday. Thank you for the calendars. Lots of love to you all
