

Arabah el Madfunah
Dec 4th 1931.

Dear Father.

I was so glad to get Mother's latest letter to hear Jaggard had given a more reasonable estimate for the garage etc, I was quite worried when I heard what Clifford & Gough & the other people would charge, I hope Jaggard will have the job. I am longing to hear the news of the progress of the building, it will be very exciting.

I have had an assessment from the Income Tax people, they are assessing me as having a fixed income of £300 a year, I have written them explaining the terms of my employment & am enclosing a copy of my letter for you to read, will you put it in my cash box with the other income papers. the box is in the long drawer of the dressing table in my bedroom, (I have a rough pencil copy by me here also) I have not mentioned having purchased more war loan since I have not yet received any interest from it & I could

not give any figures without refering to my bank book. I suppose they will send a fresh form for me to fill in. If it is sent to Avalon as I have requested will you look at it & advise me?

Our carpenter has been busy making garage doors. He came in the morning & we gave him the packing cases that our stores come in, & told him that "here is some very fine wood that will make very fine doors" he beamed, & said. "most certainly your honour". When we returned in the evening. there were two excellent doors, most wonderfully patched together, of course they do not hang straight on their hinges, nor do they meet all the way up in the centre, but no one troubles about little things like that out here. Can you imagine a British carpenter being asked to make double doors to a garage & being given packing cases for the job?

There was a terrific sparrow fight in the temple this morning, a party of birds

who live in Osiris chapel came into Amon's chapel where we are working & said rude things to the sparrows who live there. There was a haroosh you have no idea the noise & commotion 8 small spaggers can make, they completely upset our work for about 10 minutes, we couldn't hear each other speak. I think Amon's sparrows were victorious & drove the intruders out & possibly continued the battle else where.

We have been playing ping pong after lunch, it takes the stiffness out of our backs from bending over our drawing boards, & is great fun. Abdullah loves running after the balls

I have been busy making Christmas cards, I have cut a new stencil for them. Amice has made a new set of rubber stamps, you will see the results later on.

Lots of love to you both
your affectionate daughter
